YEARS BUILDING

Building products that matter

Carlier is a founder and software engineer building products end-to-end — from mobile apps and AI systems to scalable SaaS platforms. Every engagement blends startup speed with production-grade engineering discipline, focused on user experience, performance, and business outcomes.

Execution

Rapid prototyping and iterative development to reach market quickly.

End-to-End

From design to deployment, every aspect of product development is covered.

Quality

Clean code, thoughtful UX, and scalable architecture in every project.

carlier.ts

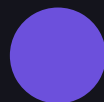

```
const founder = {  
  name: 'Carlier',  
  role: 'Founder',  
  skills: [  
    'Mobile Apps',  
    'SaaS',  
    'Data Center',  
    'Systems',  
    'Agentic AI'  
  ],  
  available: true  
};  
  
founder.create();
```

Technologies I work with

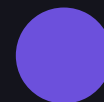

Mobile Development

Flutter (Dart) · iOS (Swift) · Android (Kotlin) · React Native

Web & SaaS

React / Next.js · Node.js · Python · Rust · PostgreSQL · MongoDB · Redis

AI Systems

LLM Orchestration · LangChain · CrewAI · Agentic AI · RAG · vLLM · Ollama

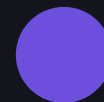

Infrastructure

AWS · GCP · Azure · Cloudflare · Docker · Kubernetes · Terraform · CI/CD

Business Software

B2B SaaS · CRM · ERP · Workflow Automation · Business Intelligence

Design & Product

Product Strategy · Prototyping · UI/UX Design · Figma · Agile

From concept to launch

A repeatable process for shipping mobile, SaaS, and AI products with startup speed and production discipline.

01

Discover

Clarify goals, users, and constraints; define product strategy.

02

Prototype

Rapid, iterative builds to validate direction fast.

03

Engineer

Production-grade mobile, SaaS, and AI systems architecture.

04

Launch & Scale

Deploy, monitor, and iterate with performance in mind.

AI mobile apps in market

Live AI-tutor and AI-scanner products, shipped and available today on Google Play.

AI

AI Agent Vchytel

Learn Ukrainian with a live AI teacher — voice chat, camera-based context, real-time translation.

[Google Play](#)

AI

AI Agent Lousi

Learn Cantonese with a live AI teacher — real conversation practice and instant translation.

[Google Play](#)

AI

AI Agent Laoshi

Learn Mandarin with a live AI teacher — voice chat and camera-based conversation support.

[Google Play](#)

AI

AI Agent Khru

Learn Thai with a live AI teacher — real-time conversation practice and translation.

[Google Play](#)

AI

Coin Identifier

AI-powered coin scanner for collectors — instant ID, valuation, rarity, and cataloging.

[Google Play](#)

A technical partner, not just a vendor

Full-stack ownership

One accountable engineer across mobile, backend, AI, and infrastructure — no hand-offs, no gaps.

Shipped, not theoretical

10+ live apps across 15 languages prove the process works in production, not just on paper.

AI-native engineering

Deep experience with LLM orchestration, RAG, and agentic systems — not bolted-on AI features.

Business-first thinking

Every technical decision is weighed against user experience, performance, and business goals.

GET IN TOUCH

Let's build something amazing together

Have a project in mind? Looking for a technical partner for mobile, SaaS, or AI? Let's discuss how to bring your vision to life.
